Please Reject NAB's petition 04-160! I use my satellite radio in the car and at home, and enjoy the ability to hear the traffic and weather. I feel it would be unfair to take that ability away from me on the satellite when this is the choice I have made for listening. I pay for the service partly because I am able to get local information like this while enjoying the programming I can only get on XM radio.

Sincerely,
Randall Sims
